In finance, statistical arbitrage (often abbreviated as Stat Arb or StatArb) is a class of short-term financial trading strategies that employ mean reversion models involving broadly diversified portfolios of securities (hundreds to thousands) held for short periods of time (generally seconds to days). These strategies are supported by substantial mathematical, computational, and trading ...

Clinical vs Statistical Significance As we've just seen, the p value gives you a way to talk about the probability that the effect has any positive (or negative) value. To recap, if you observe a positive effect, and it's statistically significant, then the true value of the effect is likely to be positive.
