I've seen analyses of the long odds the U.S. government would face if it ever attempted to confiscate civilian firearms before. The Mathematics of Countering Tyranny seems like a particularly well done example. The authors compute that under very generous assumptions there are about 83000 door-knockers available to perform confiscation raids.

Monopoly is a board game in which players roll two six-sided dice to move around the game board, buying and trading properties, and developing them with houses and hotels. Players collect rent from their opponents, with the goal being to drive them into bankruptcy. Money can also be gained or lost through Chance and Community Chest cards, and tax squares; players can end up in jail, which they ...
